Project Overview

Ever wish you did not have to wait until December to see your Spotify Wrapped? No longer is that an issue. With Unwrapped, view all of your Spotify data including top songs, and artists in one place. This data can range from a couple weeks, months, or even the whole year in review! Add friends on Unwrapped to see what they have been bumping recently, share your favorite finds, and explore new music together. Stay connected through the songs that defined your year, anytime, anywhere. With this project, we tried to keep the same styles and colors that Spotify uses to keep a familiar, modern feel. Using a dark background and the neon green Spotify accents for text and buttons, the information on the page jumps out right away.
